Linkfast Technology Co., Ltd., a Taiwan-based survey solutions provider of Geographical Information Systems (GIS) data, and a reseller of 3D laser scanning technology, has joined the Pointools Partner Program in Asia. **Pointools** software is used by project teams to reference and reuse the largest point cloud models – the billions of measurement points taken by 3D laser scanners – inside the broadest range of applications for streamlining scan-to-model workflows.

“This is excellent news for our own team and for our customers,” said Michael Lee, Sales Director of Linkfast. “Pointools software offerings perfectly complement our 3D scanning solutions from Riegl and Topcon to enable unrivalled scan data reuse across the broadest range of software apps.”

Pointools offerings include stand-alone applications, CAD software plug-ins, and a third-party development platform for point cloud processing and visualisation; uniquely enabling point cloud model reuse across Bentley, Autodesk, Safe Software, Rhino, and SketchUp applications without time-consuming translation. “We are very excited to welcome Linkfast to the Pointools Partner Program,” enthused Joe Croser, VP of Products at Pointools. “Their proven success in Taiwan’s 3D laser scanning market, and their drive to be the

first to introduce the latest technologies is unrivalled. As a result we anticipate Linkfast will become a key partner for us in Asia.”

The **Pointools** suite of software is used by architects, engineers, contractors and surveyors to leverage the same high-performance Pointools POD model file format across multiple workflows including AEC, Art & Entertainment, Forensics, GIS & Mapping, Heritage, Infrastructure, Manufacturing, Mining, Power & Utilities, and Security & Defence.

Note to editors:

Pointools is an independent software vendor dedicated to the creation of high-performance point cloud software. Incorporated in 2003 and privately held, Pointools is headquartered in the UK and sells its software through a network of Pointools Partners spread across 5 continents.

Linkfast Technology Co., Ltd. is a Taiwan-based survey solutions provider of Geographical Information Systems (GIS) data and reseller of 3D laser scanning technology. Founded in 2007, Linkfast was the first company to import the Topcon "IP-S2 Lite" to Taiwan, the first to import RIEGL's full waveform Airborne LIDAR "CP 680i," and the first in Asia to demonstrate RIEGL's mobile scan system "VMX-250." www.linkfast.com.tw
